

Welcome to **ROMEXPO**, the City of the city!

We inform you that the access to the **ROMEXPO** Exhibition Center is made only after completing the **epidemiological sorting procedure**. Thus, in the **ROMEXPO** pavilions and on the external platforms, the access is allowed only for:

persons holding **evidence of vaccination** against the SARS-CoV-2 virus attesting to the completion of the vaccination process, within 10 days of the rappel;

persons proving the **presence of antibodies** in a medical document;

persons who present the **negative result of a PCR** test performed at most 72 hours before entering the exhibition space;

persons who show a **certified negative result of a rapid antigen test** not older than 48 hours.

The documents are presented in electronic or printed format, together with the identity card, at the entrance to the Exhibition Center.

Please note that we have prepared a **test point** where participants can perform their antigen tests.

We have taken all the necessary measures so that the time spent in the **ROMEXPO** Exhibition Center is in safe sanitary conditions! We hope you have a pleasant experience!

Everything is very simple and easy to follow:

cover your nose and mouth with a mask (sorry, but the measure is mandatory throughout the visit, both inside the pavilions and outside).

strictly observe the corridors, traffic signs and entrance / exit doors.

keep a distance of 1.5 m from the other participants you interact with.

avoid physical contact with interlocutors - hugging and shaking hands can seriously damage your health.

sneeze and cough only in the bend of the elbow or on the upper arm.

disinfect your hands as often as possible (disinfectant devices are installed on the exhibition route).

Thank you!
